TITLE : GRAFT GRASPING DEVICE

ABSTRACT : PROBLEM TO BE SOLVED: To provide a graft grasping device which protects a graft softly, which can simply be grasped by a single hand and by which a graft anastomosing port is easily opened to simplify anastomosing operation.

SOLUTION: The graft grasping device (6) is provided with a graft grasping ring (3) consisting of a circular hollow pipe for grasping the graft by suction, the handle part (8) of the hollow pipe and a grasping part (4). A plurality of suction ports (5) are formed on the inside wall of the ring (3).
